

ICE NARO™

Unlimited Field of View in a Smaller Frame

The ESS ICE NARO™ is a smaller version of the ESS ICE 2.4™ eyeshield. Designed for smaller faces, this lightweight, “frameless” system offers the same excellent impact resistance, unrestricted field of view, and lens interchangeability as the larger ICE 2.4™. The ICE NARO™ also features re-designed temples that are more compatible with headborne equipment and make temple adjustment and lens interchange easier.

Lenses

- Includes up to three extra-thick, 2.4mm polycarbonate high-impact lenses (Clear, Smoke Gray, & Hi-Def Yellow). Polarized lenses available.
- Lenses feature **ESS ToughZone™** anti-scratch lens coatings
- Lenses are highly impact resistant, and exceed ANSI Z87.1-2003+ and the U.S. Military's .15 caliber ballistic impact test MIL-PRF-31013
- High level of anti-fragmentation protection that can stop a shotgun blast from a distance of 10 meters
- **ESS Modular Technology™** allows all lenses to be quickly and inexpensively interchanged
- All lenses provide 100% UVA/UVB protection & precise optical clarity for distortion-free vision

Frame

- “Frameless” ICE™ design provides unlimited field of view
- Adjustable temple lengths & bendable earpieces provide customized fit for every user
- ICE NARO™ is approximately 13mm narrower between temples than the ICE 2.4™ for improved fit on smaller, narrower faces

Rx Inserts

- Prescription lenses can be fit by any optometrist into either the **ESS P-2B™ Rx Insert**, or the **ESS Vice™ Rx Insert**
- **ESS P-2B™ Rx Insert** is also compatible with the **ESS Profile NVG™** goggle
- **ESS Vice™ Rx Insert** is also compatible with the **ESS Advancer V-12™** goggle
- Both inserts snap into the ICE™ nosepiece and install on the inside of the primary lens

Full compliance with the following standards & regulations:

- ANSI Z87.1-2003+
- Impact requirements of US MIL-PRF-31013
- US Federal OSHA standards
- CE EN 166
- Buy American Act & Berry Amendment
